Subject Index

A

absorption, see ultraviolet
acetylene tetrabromide, toxicity of, 28
acrolein, Hygienic Guide, 286
acrylaldehyde, Hygienic Guide, 286
adsorption, of radon & daughters, 180
aerosol, of o-chlorobenzylidene malononitrile, 262
  —generation of, 326
aerosols, mass distribution of, 453
  —sampling for, 388, 396
  —size distribution, 453
  —synergistic effects of, 448
air, detmn. of lead in, 481
  —dimethylhydrazine in, 239
  —ions in, 555
air pollution, detmn. of, 68
  —fallout sampler, 388
  —from incinerators, 505
  —odor evaluation, 600
  —publications, 46
  —from pulp mills, 121
  —radiation survey, 172
  —research in Canada, 517
air sampling
  —see sampling
allyl alcohol, Hygienic Guide, 636
allyl chloride, Hygienic Guide, 638
alpha scintillation, for radon daughters, 180
aluminum, Hygienic Guide, 290
  —inhalation of, 47
  —in lung ash, 47
  —pulmonary effects of, 47
ammonium sulfate, irritation by, 326
amperometric, analysis, 399
analysis,
  —by infrared, 399
    ionic-amperometry, 399
    radioactive clathrate, 399
  —for carbon monoxide, 504
    cobalt carbonyl, 245
    dimethylhydrazine, 239
    lead, 481
    mercury, 1
    nitropropane, 11
    phosphine in air, 164
animals, data from, 57
anthracene, in pulp mill gases, 121
anthanthrene, in pulp mill gases, 121
ashing, of biological materials, 481
asphalt, oil mist problem, 411
audiometers, calibration of, 334
  —standards for, 334
  —use in noise control, 344

B

barium zirconate, toxicity study, 131
behavioral, toxicity tests, 366
benzanthracene, in pulp mill gases, 121
benzene, detmn. of, 568
  —evaporation from mixtures, 99
  —exposures to, 99
  —in petroleum naphtha, 99
1,4-benzenediol, Hygienic Guide, 192
benzoperylene, in pulp mill gases, 121
benzopyrene, in pulp mill gases, 121
p-benzoquinone, Hygienic Guide, 194
beryllium, decontamination, 576
  —fire test on, 584
beta activity, near power plant, 172
biochemical, methods for TLV's, 469
blood, dimethylhydrazine in, 239
  —sampling for lead, 481
body, radioisotopes in, 492
bone marrow, radiation dose, 588
1,3-butadiene, Hygienic Guide, 91

C

calculation, of radiant heat, 103
  —of ventilation rates, 606
calibration, audiometer standards, 334
  —of fission monitor, 611
  —of Titrilog, 563
  —for ventilation training, 630
Canada, air pollution research in, 517
  —occupational health in, 517
canister, effective life of, 618
  —gas mask, 618
carbon, effects of aerosol, 448
carbon monoxide, detmn. by infrared, 504
carcinogenicity, of epoxides, 305
case histories, methyl cellosolve exposure, 36
characteristics, of critical orifice, 502
chelating agents, for radioisotopes, 492
o-chlorobenzylidene malononitrile,
  —eye irritation, 262
  —respiratory irritation, 262
chloroethane, Hygienic Guide, 531
3-chloro-1-propene, Hygienic Guide, 638
chromatography, for decomposition products, 475
chrysene, in pulp mill gases, 121
circuit, ion measuring, 555
clathrate, analysis by, 399
clothing, beryllium contamination of, 576
coating, electron microscope grids, 188
coating materials, safety of, 606
cobalt carbonyl, field test for, 245
  —generator for, 245
cobalt hydrocarbonyl, field test for, 245
cold, effect on respirators, 295
combustion, products of, 622
combustion gases, of epoxy resins, 475
community, odor problems, 600
  —radioactivity survey, 172
  —toxic exposures, 417
compensation, for pneumoconioses, 187
contamination, radioactive, 276
  —in space cabins, 168
control,
  —of coating operations, 606
    lead exposure, 63
    odor problems, 600
    toxic exposures, 417
    turbine noise, 80
    tritium hazard, 87, 276
    x-ray exposures, 588
coronene, in pulp mill gases, 121
costs, of plant health programs, 462
counting, radioactivity, 180
criteria, of noise exposure, 227
  —for toxicology, 57

Cummings Lecture, 203
curing, of coating materials, 606
curing ovens, ventilation of, 606
cyclohexane, Hygienic Guide, 529

D

Dacron, for filters, 357
decomposition products,
—of epoxy resins, 475
fluorocarbons, 198
Teflon, 198
thermal, 168
decontamination, of beryllium garments, 576
design, of apartment incinerators, 505
—of critical orifice, 502
—for ion measurement, 555
—for machines, 209
—of respirators, 295
determination, of air-borne ions, 555
—of odors, 600
—see analysis
diffusion, of stack gases, 113
dimethylformamide, toxicity of, 144
1,1-dimethylhydrazine, detmn. of, 239
—Hygienic Guide, 196
—toxicity of, 23, 137
distribution, thorium in body, 155
dithizone, detmn. of mercury, 1
—procedure for lead, 481
dose, radiation, 588
Dowclene EC, toxicity of, 541
dustfall, measurement, 68

E

early loss index, of hearing, 344
efficiency, of filters, 357
electrometer, in ion recorder, 555
electron microscope, preparation of grids, 188
electrostatic precipitator, for oil mist, 411
elutriation, of mercury, 1
emissions, from incinerators, 505
employee, health programs, 462
Enrico Fermi Power Plant, 172
epoxides, cancer from, 305
—toxicity of, 305
epoxy resins, combustion gases, 475
—decomposition products, 475
—formulations, 475
equipment, design for health, 209
—x-ray safety, 588
ergonomics, in industrial hygiene, 209
erythrene, Hygienic Guide, 91
2-ethoxyethanol, Hygienic Guide, 288
ethyl chloride, Hygienic Guide, 531
ethylene glycol dinitrate, exposure to, 435
—and nitroglycerine, 435
ethylene glycol monoethyl ether, Hygienic Guide, 288
excretion, of thorium, 155
experiments, animal vs. human, 57
explosives, exposure to, 435
exposures, to aerosol mixture, 448
—benzene from naphtha, 99
—to explosives, 435
ionizing radiation, 588
nitro-oelfins, 539
—at nuclear installations, 588
—to vinyl chloride, 265
x-ray, 588
eye, irritation, 262

F

fabric, filter effects, 357
facepiece, of respirators, 295
fallout, radiation from, 588
fiberglass, filter sampler, 404
—for filters, 357
filter paper, detmn. cobalt carbonyl, 245
filter, sampler, 404
filters, effect of fabric, 357
—efficiency of, 357
—fabric structure, 357
—impregnated, 380
—for respirators, 295
—for sampling gases, 380
filtration, effect of fabric, 357
fire tests, on beryllium, 584
fission, monitoring products of, 611
flares, combustion products of, 622
flow rate, through filters, 380
fluoranthene, in pulp mill gases, 121
fluorocarbon resins, Hygienic Guide, 198
fluoroscopes, x-ray exposures from, 588
foundries, hazards in, 127
—new processes in, 127
fume, beryllium, 584
fumigation, phosphine detmn., 164

G

gamma radiation, from neutron generator, 497
—from power plant, 172
gamma spectrometer, detmn. of radon, 180
—use in survey, 172
garments, beryllium contaminated, 576
gas masks, Army type M-11, 618
—effective life of, 618
—for hydrogen fluoride, 618
—tests of, 618
generator, for cobalt hydrocarbonyl, 245
—for cobalt carbonyl, 245
genetic, x-ray exposures, 588
geometry, and radiant heat, 103
globe-thermometer, for heat load, 103
grids, for electron microscope, 188

H

half-mask respirators, new developments, 295
health hazards, in Canada, 517
health program, multiplant, 462
hearing, test instruments, 334
hearing loss, index of, 344
—standards for, 227, 334
—study of, 344
heat, exchange formulae, 103
—exposure calculation, 103
—radiant, 103
heavy water, tritium hazard, 87
hoods, for ingot molds, 63
human, experiments with, 57
—exposure to vinyl chloride, 265
—exposures, 262
—toxicity of Dowclene EC, 541
human engineering, of machines, 209
humidity, effects on toxicity, 539
hydrocarbons, with benzene exposure, 99
hydrogen fluoride, exposure of animals, 253
—gas mask for, 618
—toxicity of, 253
hydrogen sulfide, Hygienic Guide, 92
hydroquinone, Hygienic Guide, 192
Hygienic Guides,
—acrolein, 286
—acrylaldehyde, 286
—allyl alcohol, 636

—allyl chloride, 638
—aluminum, 290
—1,4-benzenediol, 192
—p-benzoquinone, 194
—1,3-butadiene, 91
—chloroethane, 531
—3-chloro-1-propene, 638
—cyclohexane, 529
—1,1-dimethylhydrazine, 196
—erythrene, 91
—2-ethoxyethanol, 288
—ethyl chloride, 531
—ethylene glycol monoethyl ether, 288
—fluorocarbon resins, 198
—hydrogen sulfide, 92
—hydroquinone, 192
—manganese, 284
—petroleum naphtha, 427
—propenal, 286
—2-propen-1-ol, 636
—pyridine, 429
—quinone, 194
—Teflon, 198
—tetraethyllead, 423
—triarylphosphates, 534
—triorthocresylphosphate, 534
—triorthotolylphosphate, 534
—UDMH, 196
—vinyl ethylene, 91
Hylene TM, composition of, 17

I

impact tube, demonstration of, 630
incinerators, air pollution from, 505
—flue-fed design of, 505
industrial hygiene, toxicology in, 222
Industrial Hygiene Foundation, director of, 56
industrial toxicology, function of, 57
infrared, detection by, 399
—detmn. of carbon monoxide, 504
infrared spectra, of organic compounds, 533
ingestion, of radioactive materials, 492
inhalation,
—of aluminum, 47
barium zirconate, 131
dimethylformamide, 144
Dowclene EC, 541
thorium compounds, 155
titanium dioxide, 42
zirconium lactate, 131
instruments, for air ions, 555
—for hearing tests, 334
—new concepts in, 399
—for sampling aerosols, 388, 396
intoxication, see also toxicity
ion exchange, detmn. of mercury, 1
ionic-amperometric, detector, 399
ions, effect on rats, 448
—measurement in air, 555
irritation,
—by o-chlorobenzylidene malononitrile, 262
epoxides, 305
zinc ammonium sulfate, 326
isocyanate, evolution rate of, 606

K

kidney injury, by hydrogen fluoride, 253

L

labels, warning, 225
laminar airflow, system design, 453
laundering, of beryllium garments, 576
lead, in biological materials, 481
—detmn. in air, 481
—detmn. in paint, 481
—exposure controls, 63
lead peroxide, detmn. of sulfur dioxide, 68
leaded steel, controls for, 63
leakage, of fission products, 611
limits, of acceptable noise, 227
lipoid pneumonia, from aluminum, 47
liver injury, by hydrogen fluoride, 253

M

machine design, for health, 209
manganese, Hygienic Guide, 284
manual, respirator, 56
Marcali and Ranta, method, 17
mass spectrography, for decomposition products, 475
measurement,
—of air pollutants, 68
orifice capacity, 502
medical, x-ray exposures, 588
medical examinations, in explosives plants, 435
membrane filters, for sampling, 380
mercury, behavioral effects, 366
—detmn. of, 1
—toxicity of, 366
—in urine, 1
methanol, absorbing reagent, 568
methyl cellosolve, intoxication by, 36
microdosimetry, equipment for, 453
—of gases, 453
microscope, electron,
—grids, 188
milling, uranium waste, 126
missile, propellant, 23
mixture, exposure to, 435
—ions and carbon aerosol, 448
mixtures, benzene in naphtha, 99
—detmn. of, 568
—toxicity of, 541
molding, hazards in foundry, 127
monitoring, of fission products, 611
—ions in air, 555
—personnel, 281
—of tritium hazard, 276
motor activity, effects of trichloroethylene, 376

N

naphtha, benzene in, 99
—Hygienic Guide, 427
neutron generator, radiation levels, 497
—shielding of, 497
nickel carbonyl, in foundries, 127
—in pattern making, 127
2-nitro-2 butene, toxicity of, 539
nitroglycerin, exposure to, 435
—and ethylene glycol dinitrate, 435
3-nitro-3 hexene, toxicity of, 539
2-nitro-2 nonene, toxicity of, 539
nitro-olefins, toxicity of, 539
2-nitropropane, detmn. in air, 11
noise, control methods, 80
—control program, 344
—criteria for, 227
—hearing loss from, 344
—speech impairment, 344
nuclear radiation exposures, 588
nuclear reactor, monitoring products, 611

O

ocular, irritation, 262
odor, community problem, 600
—detection of, 600
oil mist, sampling for, 411
—from asphalt manufacturing, 411

—control methods, 411
olefins, nitro, 539
olefactometer, technique of, 600
olefactory, perception, 600
orifices, construction of, 502
—critical, 502
oxidation, of sulfur gases, 113

P

paint, detmn. of lead in, 481
paper, pulp mill gasses, 121
particle size, distribution, 388
—sampling of aerosols, 388
—of zinc ammonium sulfate, 326
particulates, in air pollution, 68
—detmn. in air, 68
—of fission products, 611
performance, of filters, 357
permeability, of filters, 357
pesticides, hazards in Canada, 517
petroleum naphtha, Hygienic Guide, 427
pharmacology, of dimethylhydrazine, 23
pharmacodynamic, methods for TLV's, 469
phenanthrene, in pulp mill gases, 121
phosphine, detmn. in air, 164
physiology of work, 209
pigeon, behavioral studies of, 366
plume, from power plant, 113
plutonium, in the body, 492
pneumoconioses, compensation for, 187
pneumonia, lipoid from aluminum, 47
porosity, of filters, 380
potassium bromide, infrared optics, 533
powder, aluminum, 47
power plants, sulfur gases from, 113
prediction, of toxicity, 57
presbycusis, values in study, 344
propellant, missile, 23
propenal, Hygienic Guide, 286
2-propen-1-ol, Hygienic Guide, 636
protective clothing, for tritium hazard, 276
psychophysical, methods and factors, 209
pulmonary effects, of aluminum, 47
—of titanium dioxide, 42
pulp mills, stack gases of, 121
pyrene, in pulp mill gases, 121
pyridine, Hygienic Guide, 429
pyrotechnics, combustion products of, 622

Q

quinone, Hygienic Guide, 194

R

radiant heat load, 103
radiation, exposure of organs, 588
—natural background, 588
—plant survey, 172
—protection, 172
radioactivity, accumulation of, 172
—radon and daughters, 180
radioisotopes, in the body, 492
—in foundries, 129
radon, detmn. in air, 180
—detmn. by charcoal adsorption, 180
—detmn. on filter paper, 180
radon daughters, detmn. in air, 180
range-finding, toxicity data, 305
Ranta and Marcali, method, 17
reactor, tritium from, 87
recorder, for air ions, 555
reference levels, of audiometry, 334
regulations, for x-ray machines, 588
respirator, manual, 56
respirators, development of, 295
—tests and types, 295
respiratory, irritation, 262
—protection developments, 295
retention, of inhaled aluminum, 47

S

sampler, fiberglass filter, 404
—high volume, 404
sampling,
—for aerosols, 326, 388. 396
air pollutants, 404
dimethylhydrazine, 239
—by impregnated filters, 380
—for oil mist, 411
phosphine in air, 164
—stack gases, 113
—for sulfur gases, 113
—traces of gases, 380
Savannah River Plant, tritium hazard, 276
separation, of mercury, 1
skin absorption, of ethylene glycol dinitrate, 435
—of nitroglycerin, 435
Skinner box, learning rate by, 448
smog, aerosols defined, 453
smoke bombs, combustion products of, 622
soiling index, measurement, 68
solvents, ventilation for, 606
sound levels, allowable, 80
—of gas turbine, 80
Soviet, threshold limits, 469
space travel, toxic hazards, 168
spectrophotometry, detmn. by, 568
speech, noise interference, 227
—through respirators, 295
speech loss, index of, 344
spray, sampling for, 388, 396
stack gases, composition of, 121
—from pulp mill, 121
—sulfur dioxide in, 113
standards,
—for acetylene tetrabromide, 28
beryllium contamination, 576
dimethylformamide, 144
hearing tests, 334
international TLV's, 469
noise exposures, 227
thorium concentrations, 155
Dowclene EC, 541
vinyl chloride, 265
static pressure, demonstration of, 630
strontium, in the body, 492
sulfur dioxide, in air pollution, 68, 113
—from burning coal, 113
—detmn. in air, 68
—detmn. by Titrilog, 563
—oxidation of, 113
—sampling for, 113
sulfur trioxide, sampling for, 113
supplied air, respirators, 295
surveys, plant health programs, 462
swimming tests, after trichloroethylene exposure, 376

T

Teflon, Hygienic Guide, 198
TEL, see tetraethyllead
temperature, effect on respirators, 295
—of radiant surfaces, 103

tetraethyllead, Hygienic Guide, 423
tetrabromoethane, toxicity of, 28
tetrachloroethylene, toxicity in mixture, 541
tetrachloromercurate, method for sulfur dioxide, 68
TDI, detmn. of, 17
therapy, for internal radioisotopes, 492
thermal decomposition, products of, 168
thorium, in body, 155
—excretion of, 155
thorium chloride, inhalation of, 155
thorium citrate, inhalation of, 155
threshold, of hearing loss, 334
—odor perception, 600
threshold limits, for neutron flux, 497
—toxicology for, 225
—for vinyl chloride, 265
threshold limit values, international, 469
titanium dioxide, inhalation by rats, 42
—pulmonary effects of, 42
Titrilog, detmn. of sulfur dioxide, 113
—correction of, 563
TLV's, see threshold limit values
tolerance, to noise, 227
toluene, detmn. of, 568
toluene-diisocyanate, detmn. of, 17
toxicity,
—of acetylene tetrabromide, 28
aluminum powder, 47
—barium zirconate, 131
—behavioral studies, 366
—of combustion products, 622
—detmn. of, 57
—of Dowclene EC, 541
dimethylformamide, 144
dimethylhydrazine, 23, 137
epoxides, 305
—by experiments, 57
—of flare products, 622
hydrogen fluoride, 253
methyl cellosolve, 36
—of mixture, 541
nitro-olefins, 539
pyrotechnics, 622
smoke bombs, 622
thermal decomposition, 168
—total exposure, 417
—of trichloroethylene, 376
zirconium lactate, 131
toxicological, methods for TLV's, 469
toxicology, in industrial hygiene, 222
toxicopathology, of hydrogen fluoride, 253
training, ventilation, aid, 630
triarylphosphates, Hygienic Guide, 534
1,1,1-trichloroethane, toxicity in mixture, 541
trichloroethylene, effects on rats, 376
—toxicity of, 376
triorthocresylphosphate, Hygienic Guide, 534
triorthotolylphosphate, Hygienic Guide, 534
tritium, in body, 87
—detection of, 87
—hazards from, 87
—health hazards, 276
—from neutron generator, 497
—from reactor, 87
tumors, from epoxides, 305
turbine, control of noise, 80

U

UDMH, see dimethylhydrazine
ultraviolet absorption, of benzene, 568
—of toluene, 568
—of zylene, 568
uranium, milling waste, 126
urine, detmn. of lead in, 481
—mercury in, 1

V

Vacutainers, for blood samples, 481
vanillan, in pulp mill gases, 121
ventilation, for coating curing, 606
—for leaded steel, 63
—training aid, 630
vinyl chloride, toxicity of, 265
vinyl ethylene, Hygienic Guide, 91
voice, transmission, 295

W

waste, from uranium milling, 126
water, dimethylhydrazine in, 239

X

xylene, conversion factor, 16
—detmn. of, 568
x-ray
—medical exposures, 588

Z

zero-drift, of Titrilog, 563
zinc ammonium sulfate, irritancy of, 326
zinc sulfate, irritation by, 326
zirconium lactate, toxicity study, 131
